A C Q U I R E

Technology

TDV Cam is a true stereoscopic, high definition, tapeless digital video camera technology. TDV Cam technology features an embedded real time encoder based on the TDVCodec format, HD S-3D ready video format deployment. Users can capture life as it is. Users can record live events, and view them back later to feel as though they are back in the action. TDV Cam technology can be integrated along with other camera components and platforms.
